## DEPARTMENT OF AGRICULTURE, BENGAL.

Dacca, the 1st May 1937.

### Third and Final Forecast of the Spring Oilseed Crops of Bengal, 1936-37.

(Note.—On an average of the five years ending 1934-35, the area under linseed in Bengal has represented some 3.6 per cent. and that under rape and mustard 11.6 per cent. of the total area under these crops in British India.)

*Character of the season.*—As reported in the second forecast the weather was generally favourable for sowings and for the early period of growth. Subsequent conditions were more or less helpful except in parts of Presidency Division where heavy rainfall affected the crops. Injury to crops by insect-pests is reported from some districts. On the whole, the season was satisfactory for the crops this year.

*Area sown.*—Oilseeds are chiefly grown in the Rajshahi, Dacca and Presidency Divisions. In the other two divisions the cultivation is not extensive. The total area under these crops (excepting sesamum for which separate forecasts are issued) is returned at 916,700 acres as against 850,400 acres last year.

*Outturn.*—From the District Officers' estimates the provincial outturn of the different oilseed crops works out at 85 per cent. as against 76 per cent. last year.

Taking 7½ths maunds as the normal yield per acre for linseed, 7½ths maunds for rape and mustard and 4½ maunds for other oilseeds, the total yield of the crops for the province is estimated at 211,500 tons this year as against 176,700 tons last year.

M. CARBERY,

Director of Agriculture, Bengal.

**Notices.**

3. If in any case the District Health Officer considers that the issue of a notice under these regulations is likely to lead to such an amount of delay as might facilitate the spread of cholera he may forthwith take such steps as he may think fit for carrying out the work, and shall thereafter, as soon as possible, issue a notice on the person concerned stating the reason why such work has been carried out.

4. If any measure which the District Health Officer has, by a notice issued under these regulations, required to be carried out, be not carried out to his satisfaction within the time stated in the notice the District Health Officer shall be entitled to carry out the measure.

18. The District Health Officer or a Sanitary Inspector may forbid any person who has been a patient or who has, to his knowledge, been in contact with a patient, to act as vendor of any article for such period as may be specified in the order.

18A. No person shall carry or permit to be carried in a public conveyance a patient except in the case where a patient is carried with proper precautions to a hospital.

(1) When the District Health Officer or a Sanitary Inspector is of opinion that the water in any well, tank, pool or other possible source of water-supply is contaminated or is likely to be contaminated, he may at once take such steps as he deems necessary to close such well, tank, pool or other source of water-supply, or may require the owner or occupier of land upon which such well, tank, pool or source of water-supply is situated, to take steps to close the same to the satisfaction of the District Health Officer or the Sanitary Inspector, as the case may be, within such time as may be specified in the order.

(2) The District Health Officer or a Sanitary Inspector may require such owner or occupier to keep closed during such a period as shall be specified in the order any well, tank, pool or other sources of water-supply closed under paragraph (1) of this regulation.

22. The District Health Officer or a Sanitary Inspector may prohibit persons from entering into or using for drinking, bathing, or any other purpose, during such period as may be specified in the order, the water in any well, tank, pool or other possible source of water-supply, which, in his opinion, is contaminated or likely to be contaminated.

The District Health Officer or a Sanitary Inspector may, by an order published at such places as he may think fit, set apart any well, tank, part of a river, stream or channel not being private property, or being private property with the consent of the owner, for the supply of water for drinking or culinary purposes and may prohibit therein or within a distance therefrom to be stated in the order all bathing, washing of clothes or animals, or other acts calculated to pollute the water; and may similarly set apart any well, tank, part of a river, stream or channel for the purpose of bathing or for the purpose of washing animals or clothes or for any other purpose connected with the health and cleanliness of the people using such water-supply.

24. The District Health Officer or a Sanitary Inspector may prohibit persons from casing themselves, or throwing, depositing or discharging any rubbish, sewage or offensive matter, into any well, tank, pool or other source of water-supply, which is used by the public, or within such a distance from such well, tank, pool or source of water-supply as he may fix.

*Explanation.*—In this regulation, “nuisance” means anything which in the opinion of the District Health Officer or Sanitary Inspector is likely to spread or to cause the outbreak of cholera.

26. Whenever the District Health Officer or a Sanitary Inspector is satisfied that the condition of any privy, urinal, drain, sewer or cesspool is such as to cause risk of spreading cholera to the inhabitants of the neighbourhood he may order the occupier of the land in which such privy, urinal, drain, sewer or cesspool is situated to disinfect, or to allow an officer of the Board to disinfect, the same with such disinfectants in such quantities and at such time as the said officer or inspector shall think fit.

27. The District Health Officer or a Sanitary Inspector may for the prevention of the outbreak or spread of cholera order the owner or occupier of any land to repair or make efficient to the satisfaction of that officer or inspector any drain, sewer, privy, urinal or cesspool which is situated upon such land or to remove any such drain, sewer, privy, or urinal or close any such cesspool within such time as may be fixed by the said officer or inspector.

29. The District Health Officer or a Sanitary Inspector may require the owner or occupier of any land to clear and remove, within the period specified in the order, any vegetation upon such land the existence of which in the opinion of the said officer or inspector conduces to the committing of nuisances upon such land.

30. The District Health Officer or a Sanitary Inspector may issue general orders that by a specified date certain sanitary precautions of a simple nature, such as lime-washing of houses, clearing of latrines or the removal of filth or rubbish shall be carried out to his satisfaction.

31. The District Health Officer or a Sanitary Officer may prohibit persons from retaining or selling clothes taken from the bodies of persons who have died of cholera and may cause any such clothes to be destroyed.

32. No person shall, without the written permission of the District Health Officer or a Sanitary Inspector dispose of any corpse except by burning or burial.

35. The District Health Officer may direct that no person shall bury or cause to be buried any corpse which, in the opinion of the District Health Officer, is likely to spread cholera, in a grave, not constructed of masonry and less than six feet deep.

36. The District Health Officer may order that no *dome* or other servant of the Board employed for the disposal of corpses shall withdraw from his duties without the permission of the District Health Officer unless such *dome* or other servant of the Board has given notice in writing not less than one month previously of his intention so to withdraw.

37. The District Health Officer or a Sanitary Inspector may through any person authorised by such officer or inspector in that behalf seize and dispose of any corpse, which in the opinion of the said officer or Inspector, is infected with or is likely to spread cholera, unless the relatives or friends of the deceased person satisfy him that they are prepared and able to dispose of the corpse in a manner which will prevent the spread of cholera.

38. (1) The District Health Officer or Sanitary Inspector may require any person who appears to be acquainted with facts in connection with any case of cholera or suspected cholera to attend before him at a time to be stated in the order and at any place not more than one mile from the place where such person resides or is staying when the order is issued, and such person shall appear as so required.

(2) When the person summoned to appear under paragraph (1) is a female who, by the custom of the country, does not appear in public suitable precaution shall be taken to respect the said custom.

39. (1) The District Health Officer or a Sanitary Inspector may examine orally any person who appears to be acquainted with the facts and circumstances of a case of cholera or suspected cholera.

(2) When the person to be examined under paragraph (1) is a female who, by the custom of the country, does not appear in public, the officer shall take her statement under such conditions as shall admit of due respect to the said custom.

(3) Such person shall be bound to answer all questions relating to such case put to him or her by such officer, other than questions the answers to which would have a tendency to expose him or her to any criminal charge.

40. The District Health Officer or a Sanitary Inspector may, with such assistants (if any) as he thinks fit, enter upon any land, or after two hours' notice in writing, into any premises or building used for human habitation at any time between sunrise and sunset for the purpose of carrying out any measure or making any enquiries authorised by these regulations.

**24-Parganas.**—No. 1777P.H.—18th May 1937.—In pursuance of rule 8 of the rules for the preparation, publication and execution of projects for water-supply, sewerage or drainage by municipal authorities, it is hereby notified for general information that the scheme for the supply of filtered water to the Garden Reach Municipality has been approved by the Governor of Bengal, and

that the particulars of the said scheme are as follows:—

(a) The scheme is designed to give an initial daily supply of 560,000 gallons of filtered and chlorinated water to a population of 56,000 persons. The water, which will be drawn from the Calcutta Corporation mains, will be measured by a venturi meter to be provided by that body, and will be paid for at the rate of 4 annas per 1,000 gallons. If required, the daily supply can be raised to 640,000 gallons by pumping for longer hours.

The distribution of the water will be made on the "decentralised storage" system. In preparing the scheme the possibilities of an independent supply has been kept in view, and the distribution system has been so designed as to be capable of being fed from either source.

The filtered water in the Calcutta Corporation mains will be led by an 18" diameter pipe to the existing elevated reservoir of 20,000 gallons capacity where it will be chlorinated as an additional measure of safety. It will then be delivered to the town through a 15" trunk main. Arrangements are provided by means of which it will be possible to maintain a pressure of 80 feet.

The scheme provides for 600 house connections in addition to 190 street tanks.

(b) The estimated cost of carrying out the scheme is Rs. 3,60,500 excluding cost of land.

(c) The estimated cost of maintenance is Rs. 66,600 per annum, on the basis of daily supply of 560,000 gallons in seven hours.

(d) Both the capital and the annual maintenance costs will be met from the municipal fund.

(e) The total annual charge to be met by water rate is estimated to be Rs. 53,667, and the balance of the maintenance cost will be made up from the general fund.

(f) The percentage of water rate on the annual value of holdings is  $3\frac{1}{2}$  per cent.

(g) The average incidence of such water rate per head of the population will be 15·37 annas.

2. The scheme will be taken into consideration on or after the 15th July 1937, and any objection or suggestion with regard thereto, which may be received by the undersigned before that date, will be duly considered.

Calcutta, the 17th May 1937.

**DEPARTMENT OF AGRICULTURE,  
BENGAL.**

Dacca, the 5th May 1937.

**Final Forecast of the Wheat Crop of Bengal,  
1936-37.**

(Note.—On an average of the five years ending 1934-35, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India and (b) in the territory now reported on has, in the five years ending 1934-35, averaged (a) 41·3 and (b) 9·7 per cent., respectively.)

*Character of the season.*—Since the issue of the third forecast, conditions have remained practically unchanged except in the districts of Murshidabad and Dacca where the outturn in the case of former

has increased owing to favourable weather and in the case of latter has been reduced owing to drought.

*Acreage.*—According to District Officers' estimates, the total area sown is 149,500 acres this year as against 127,100 acres last year.

*Outturn.*—The provincial outturn as worked out from the district estimate is 84 per cent. of the normal as against 70 per cent. last year. Taking the normal yield to be 10 maunds per acre, the gross yield of the crop for the province is estimated at 46,100 tons this year as against 32,700 tons last year.

At the end of April the wholesale price of wheat in the Calcutta mart was Rs. 3-15 annas per maund or about 15 per cent. higher than the price ruling at the corresponding period of last year. The price of common rice at Calcutta, on the other hand, was Rs. 4 per maund or about 11 per cent. lower than last year.

M. CARBERY,  
*Director of Agriculture, Bengal.*

## DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 19th May 1937.

**Summary.**—Excepting heavy showers in places the rainfall was generally light to moderate. Sowings of autumn crops are nearly finished in East and North Bengal, but more rain is needed for the progress of the operations in parts of West Bengal. Conditions of the standing crops have much improved by recent rain and the prospects appear to be satisfactory. The average price of common rice for the province has risen by about 1·31 per cent. as compared with that of the previous week.
